Concurrent Technologies Plc

AGM Statement

At today's Annual General Meeting of Concurrent Technologies Plc (the "Company"), a world leading specialist in the design and manufacture of high-end embedded computer products for critical applications in the defence, aerospace, telecommunications, transportation, scientific and industrial markets, Michael Collins, Chairman, will make the following statement:

"I am pleased to report that the Company's performance in 2014 has been in line with the Board's expectations. Our investment in developing single board computers with AMC architecture is producing good revenues, particularly from product applications in telecommunications. These revenues have helped to offset the UK Government export licencing issues that the Company expects to be relaxed during June 2014.

Our Engineering skill set has been expanding since we began recruiting for our new R&D facility in Massachusetts, USA, and our financial position remains strong after paying an increased second interim dividend. The Board remains positive about the outlook for the rest of the year."
