

24 March 2022

**Concurrent Technologies Plc**  
(the 'Company')

**Notice of Results**

Concurrent Technologies Plc (AIM: CNC), a world leading specialist in the design and manufacture of high-end embedded computer boards for critical applications, today announces that it expects to publish its full year results for the year ended 31 December 2021 ("FY21") during or around the last week of April 2022.

The Company's auditor, Grant Thornton UK LLP, has advised the Company that it will require additional time to complete the final audit procedures due to ongoing illness associated with Covid-19 within both Concurrent and the audit team, which may also require a new partner to be assigned to the audit.

As previously announced in the Trading Update on 5 January 2022, the Company expects to report revenues and profitability slightly ahead of market expectations despite the ongoing challenges that the worldwide component supply chain is experiencing. Whilst the component issues experienced in FY21 are ongoing, with no sign of improvement, the Company entered 2022 with a robust order book and an exciting pipeline of innovative product releases to grow the customer base and revenues as the component supply normalises, the results of which have already been demonstrated with the Company's announcements of product releases and contract awards in the current year.
